

HUNTERSTONE MAN MADE SANDSTONE PRODUCTS

CLEANING & STAIN REMOVAL TIPS USING COMMON HOUSEHOLD GOODS

Most stain can be removed from our products using standard household products. If the stain is particularly difficult to handle, a commercial stain remover such as Dry Treat X-Duty cleaner can be used.

Problem	Removers
Blood	Baking soda, bleach, hydrogen peroxide
Chewing gum	Ice cubes, paint remover, eucalyptus oil
Coffee	Baking soda, bleach, hydrogen peroxide
Dyes	Bleach
Efflorescence salts	Hydrochloric acid (refer cleaning instructions)
Fats	Detergent, soda
Fruit juices	Baking soda, bleach, oxalic acid
Grease	Detergent, plaster of Paris
Ink	Baking soda, bleach
Iodine	Ammonia
Leaves	Bleach with hot water and stiff broom
Mould/Mildew	Ammonia, baking soda, bleach and stiff broom
Motor oil	Plaster of Paris (apply in powder form)
Mustard	Bleach
Nail polish	Bleach, nail polish remover
Pain	Paint remover
Paw prints	Bleach with hot water and stiff broom
Rust	Baking soda, sourcing powders, oxalic acid
Rubber soles	Methaline chloride (wipe off with white cloth after 10 min)
Tar	Ice cube, paint remover
Tea	Bleach, hydrogen peroxide
Tough stains	Oxalic acid
Vegetable oil	Baking soda, detergent
Water/mineral stains	White vinegar
Wine	Baking soda

Most of these cleaning products are available through your local supermarket or hardware store.

Please review the directions on the package before using any products for efficiency and safety.

Note: Always test products on a small area first.
