## Free Form Pools & Template Pieces

---

### Free Form Pools

Many pool builders use free form methods when laying out their pool sites, such as kidney shapes, oval etc.

This type of pool needs to be site measured and is very time consuming and more expensive to quote.

We would recommend a professional paving contractor of our choice to lay this type of coping or someone who is competent enough to cut the job in.

### Template Pieces

Template pieces are designed to enhance the aesthetic appeal of the job and also when standard pieces will not suffice.

They are hand made and shaped and can cost up to \$247.00 each.

However there are numerous pools which require these template pieces.
